Dear Hiring Manager,

After more than 20 years in the IT industry, in 2005 I was faced with a choice: find another job as a network engineer, or do something else. I decided to follow a lifelong dream and work in the aerospace industry. My new mission statement: **To contribute in a material way to the creation of a spacefaring civilization.**

After some research, I decided the best combination of a strong existing aerospace industry, new opportunities in new space industries, and livability was found in Las Cruces, NM. My wife and I moved here in 2006.

A chance discovery of New Mexico State University's new Aerospace Engineering degree program prompted my immediate return to college. I am currently in my junior year as a BSAE major. A transcript is available on my website, listed above.

Besides my two decades of workforce experience, I also offer the following strengths:

- * creativity and flexibility
- * strong focus on customer needs
- * excellent communication skills
- * supportive team player
- * skilled troubleshooter
- * commitment to excellence

Please look over my resume and the other resources available on my website, and let me know if you have any questions.

Thank you for your time and consideration. I look forward to hearing from you!

Warm regards,

Doug Weathers
